

Basic app that was created after you ran: **ember new 'name'**

in the **app/templates/application.hbs** you will see:

```
<h3 id="title">Welcome To Ember</h3>
{{outlet}}
```

this is the template that represents the markup that wraps the body of our app.

app/routes/index.js

you will see

```
import Ember from 'ember';
export default Ember.Route.extend({});
```

example:

```
import Ember from 'ember';
export default Ember.Route.extend({
  model(){
    return ['red', 'green', 'blue'];
  }
});
```

app/templates/index.hbs

From the example above: you will see:

```
<ul>
  {{#each model as |color|}}
    <li>{{color}}</li>
  {{/each}}
</ul>
```

Which translates into the html below.

app/index.html

```
<ul>
  <li>red</li>
  <li>green</li>
  <li>blue</li>
```
